For my Gridfinity storage I needed bins without the lables and the rounded inside.

So here are some in sizes from 1x1 to 3x3 In different heights.

The name of the objects are the dimensions, for x and y and the height. According to Zack Freedman, the height is a multiple of 7mm:

- 2 = 14mm
- 3 = 21mm
- 4 = 28mm
- 6 = 42mm

Update 23.04.2022

the versions for the 3x3 boxes had a smal issue. Noticed it as I tryed to paint on support for the holes on the groundplate. The objects wasn't exported as a complet object from Fusion, now they are fixed.
